

THE PROJECT

Deal with digital work based learning is an Erasmus+ project developed by an international Consortium made up of 8 partners from 5 European Countries. The project is aimed at innovating and making work based learning experiences more accessible through digital tools. Deal with Digital WBL is aimed at:

- Develop a framework of **innovative pedagogical approaches** and an appropriate **quality framework** to support the digital transformation of WBL experiences;
- Develop a **competence framework** on emerging digital skills for the VET trainer needed to innovate WBL methodology, laboratory and experiential online learning.
- **Encourage VET trainers to acquire specific competences** to design, deliver, evaluate and validate skills learned through Digital WBL experiences;
- Create stimulating and inclusive opportunities for VET trainers to further their **professional development**.

For additional information visit our project website www.digitalwbl.com

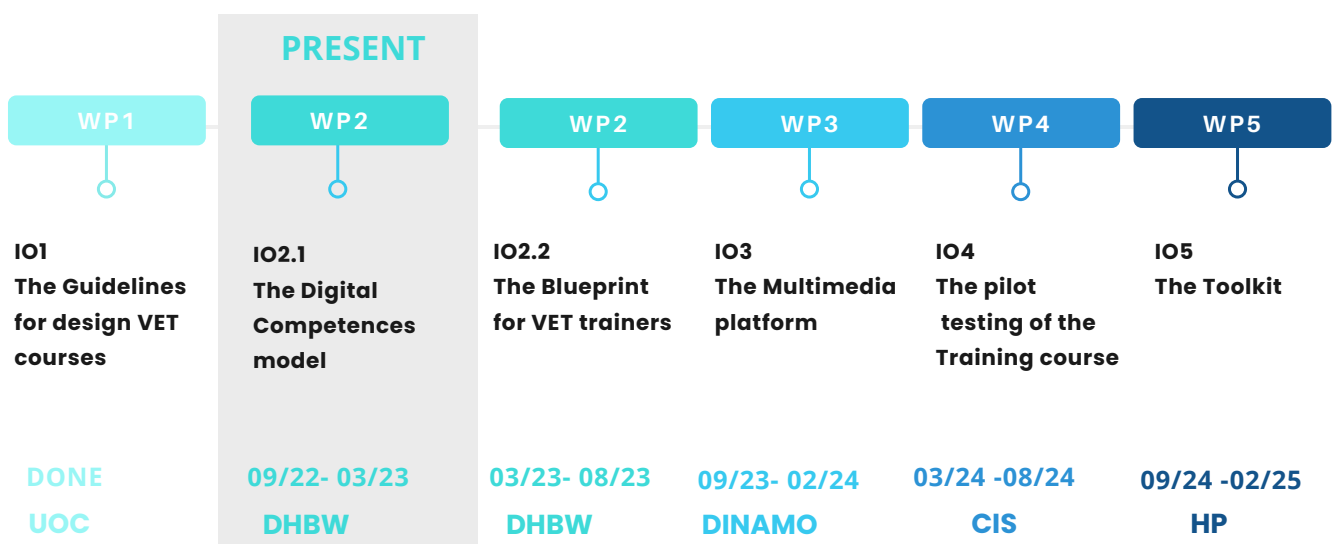

PARNERS

The Deal with Digital Work-Based Learning project brings together an innovative Consortium made up of VET providers, research centres, SMEs and non-governmental associations. The partnership, led by **SFC** Sistemi Formativi Confindustria, was set up following the identification of excellence in the areas of digitisation applied to WBL and VET systems.

On the one hand we have the university world represented by **UOC**, Duale University **DHBW** and **PANKO** that will guide us into the methodological framework and VET competencies. On the other hand we have relevant associations of SME, unions of industry chambers and entrepreneurs represented by **HANSE PARLAMENT**, **IPOSZ**, **CIS** and **SFC** that will contribute with the proximity with businesses. Finally we have **Dinamo 3D** that is an excellence in the use of digital solutions that will facilitate the use of the project products.

TIMELINE

THE AMBASSADOR PROGRAMME

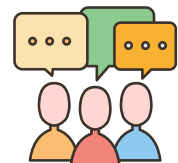

The Ambassador Programme is an opportunity for VET teachers to become digital teaching changemakers/ambassadors and establish a community in cooperation with an international institutional network. The ambassador Programme is aimed at promoting students' (digital) Future Skills with different workshops/training opportunities. The Ambassador Programme will be a group of experts in digital systems applied to the dual approach, understood in all its forms:

- Digital work-based learning of a hybrid type, i.e., use of digital tools to support the work-based learning experience
- Comprehensive digital work-based learning, e.g., such as the use of technical and specialized labs in virtual and augmented reality to implement VET learning experiences in a simulation environment

THE ACTIVITIES

The Ambassadors will be involved in the following activities:

- **THE WORKSHOPS:** the participation to four short monthly digital workshops to exchange good practices, learn from each other and receive input on topics such as the competences framework, Open Educational Resources (OER) or Augmented Reality/Virtual Reality (AR/VR). The meeting will take place monthly from November 2022 to February 2023.
- **THE COURSE:** we ask to all our ambassador to participate to the training for trainers course "Deal with digital WBL". The course will be available on the project multimedia platform from March 2024.
- **THE MOBILITY:** the ambassadors will have the chance to participate to the project learning training activity in Karlsruhe, Germany on March 2023, someone in presence and someone by remote

AMBASSADOR PROFILE

- VET educators
- Computer scientists, Experts in digital programme in Ed-tech and Programme developer
- Expert of local technical agency for digital development
- Programme developer
- All those are interested in the project topic

REGISTRATION FORM

If you are interested in participate to the Ambassador Programme, just fill the form from [this link](#)
